

Design for your life

M I S T R A L

MISTRAL is storage furniture in timeless Danish design with high quality. Created for life. From your first small apartment to the day you require more space – and perhaps will need to decorate your home for an entire family. A flexible range of furniture that can grow with you and your needs. The modules can be combined in new ways, and can always be expanded with new ones.

You can surely call MISTRAL living Danish craftsmanship. Designed, manufactured and assembled in Denmark. At the Hammel furniture factory, which was founded way back in 1961.

There is always something you want to hide away

We all have them in our home. The little secret things that just do not have to stand out where everyone can see them. Perhaps, they are just a little too private. A little too revealing. It may be personal memories of the past – or a hobby that should not be talked about.

MISTRAL makes it easy to store and hide away stuff. And when the aunt comes to visit, you can quickly find that dreadful gift and let it emerge from hiding and put it in the spotlight. For a while ...

MISTRAL - Made in Denmark

Media furniture designed to maximise the enjoyment of your video and audio systems.

A unique 3D drawing program, where everyone can create a nice décor in Mistral design.

Many modules are available in several depths – this provides a great deal of flexibility.

Add colour

If there are colours to everyday life, then play with the Mistral colour universe in interaction with the colours of your home's walls. **MISTRAL is available in 11 colours plus 5 wood colours in genuine wood veneer.** Combine them as you yourself find best, and let the modules appear as a neutral or contrasting background for your stuff.

Create depth and a vivid game in your living room by combining wood with colours. You can also mix and match different colours and materials. For example use fabric door to create a warm and tactile atmosphere.

Space for all your private hobbies.

Sliding doors are an elegant solution that does not take up space in the room.

Func- tionality

MISTRAL is functional quality furniture, where drawers and doors slide easily and are easy to use. Again and again.

The functionality is also reflected in the specially-designed media furniture that is designed to optimise the joy of a good sound and image experience.

Well-thought-out and beautiful

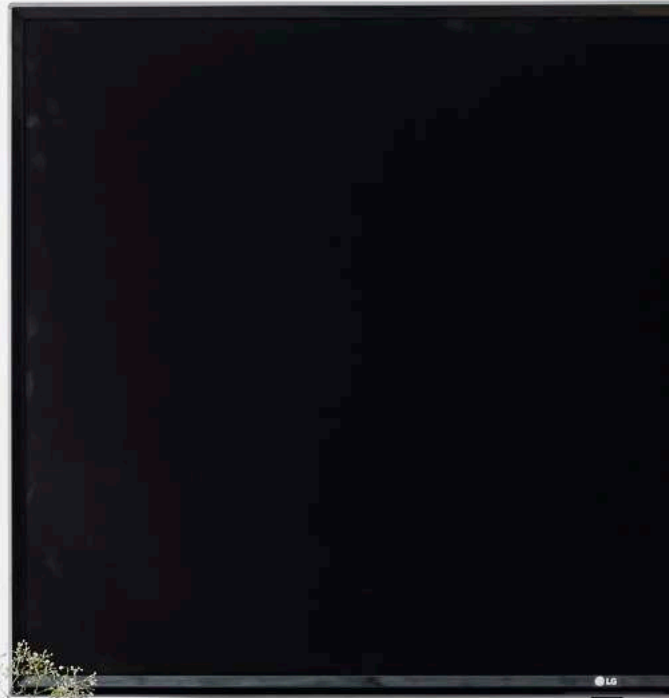

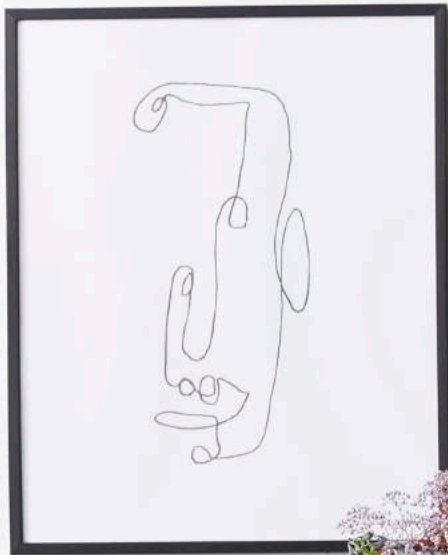

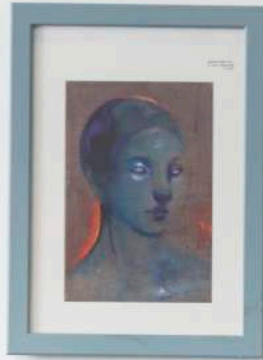

MISTRAL hides your speakers and media technical components behind beautiful fabric covers and fabric flaps, where the audio and the signal from the remote control travel freely through, unhindered. You also receive a nice finish with the special wire cover.

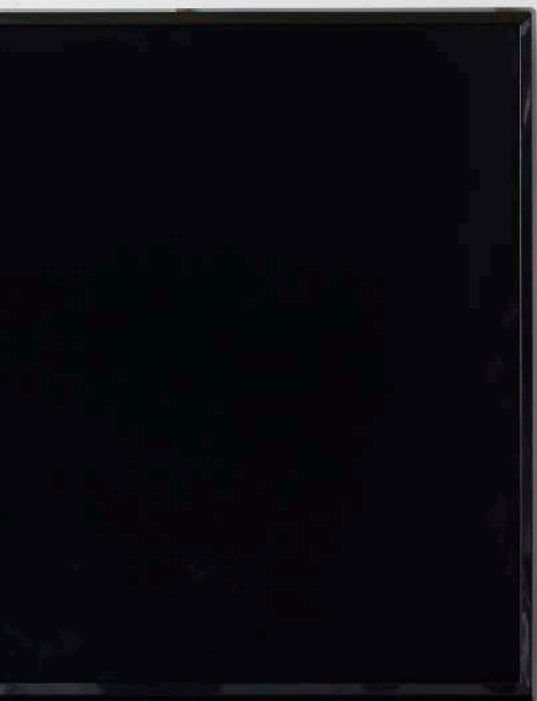

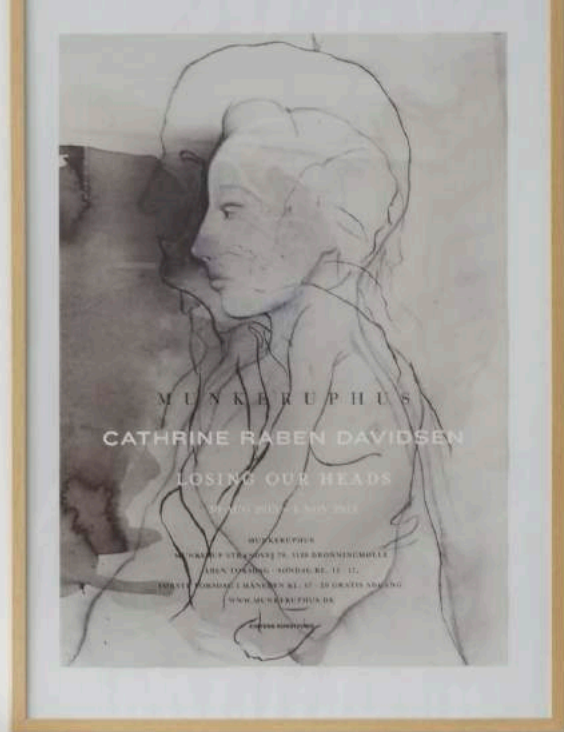

The dimensions are suitable for 90% of all AV devices – available in all MISTRAL colours.

Good sound is to be heard. Cables and other equipment do not need to be heard with the experience. Hide them in a beautiful and functional piece of furniture.

For soundbar

Your choice of media modules can be tuned towards the elegant and bright, or darker and robust. Easily adapted to the size of the room and can always be expanded as needed.
